BILL BUCHMAN AMERICAN PAINTER

Bill Buchman, born in 1947, is an internationally represented American artist who has recently returned to the US and settled in Sarasota after living and working for the past twenty years in Europe, primarily in Copenhagen and Paris. Currently Bill is on the faculty of the Longboat Key Center for the Arts and Art Center Sarasota where he gives workshops in drawing and abstract art. His paintings are in private and public collections in Denmark, Sweden, and the US. His work may also be seen at galleries in Sarasota, New York, Copenhagen, Nice, and Houston. The multi-talented Mr. Buchman is also an accomplished jazz pianist, a composer of film music and a writer of poetry and short stories.

Bill says of his work: "The ideas and techniques of European modernism of the early 20th Century, the artistic philosophy and methods of Chinese and Japanese painting, and even Renaissance and classical concepts are all sources for my painting. Harmony is the keynote. Indeed, many other ideas from the realm of music provide me with inspiration."

What others say regarding Bill Buchman's art:

"The aesthetics at work are powerful and moving because they convey a vision of life and a sense of purpose yet they also please the eye."

-Richard Swett, Architect and former US Congressman and Ambassador to Denmark.

"[Bill's] nude female figures carry simplicity in art to its ultimate."

"It reminds me of Lautrec, who took a minimum of lines to hint at a human being."

-Jerry McClish, Art Critic, Long Boat Observer
